World Nature Conservation Day on 28th July

The Environmental information System (ENVIS) of Centre of Advanced Study in Marine Biology (CASMB) celebrated the World Nature Conservation Day on 28th July.

1. During the celebrations of the World Nature Conservation Day, the importance of marine ecosystems was explained especially conservation of wetlands, coral reefs and other coastal ecosystems. Impact of climate change on marine biodiversity was also discussed.
2. Posters related to International Mangrove Day (26th July), World Nature conservation Day (July 28th) and Newspaper clippings on Marine environment (volume 34) were released on that day.
3. Forty three (33) participants (teachers, students and other staff) took part in this activity.

Releasing of posters on the International Mangrove Day (26th July) and World Nature Conservation Day (28th July) and News clippings on Marine Environment

Participation of students and teachers in World Nature conservation Day
